A year of growth and momentum

FY2026 was a year of strong momentum for Siemens Energy India Limited, as the company continued to deliver profitable growth while strengthening its position as a focused energy technology company. The company secured significant orders across transformers, switchgears,

substations, grid stabilization, industrial steam turbines and services, while expanding its presence in export markets.

India's growing electricity demand, driven by rapid electrification, industrial expansion and increasing integration of renewable energy, continue to create significant opportunities across the energy value chain. To support this growth, SEIL is making strategic investments to expand its manufacturing footprint. During the year, the company progressed capacity expansion at its large power transformer facility in Kalwa and high-voltage switchgear facility in Chhatrapati Sambhajinagar, while announcing an investment of INR 2,060 crore to add approximately 30,000 MVA of large power transformer capacity, further reinforcing its commitment to Make in India and to serving growing demand in India and global markets.

Importantly, as a company that considers safety as its license to operate, the company closed FY2026 with zero fatalities and zero lost time injuries. Sustainability remains at the core of its operations, with 100% renewable energy[1] (across all manufacturing locations), zero waste to landfill, zero liquid discharge (across manufacturing locations) and 46% reduction in Scope 1&2 GHG emissions against 2019 baseline.

On the people front, SEIL achieved 18.15% gender diversity that extends across all job families. Continuous learning is at the heart of people's growth strategy, with the company offering an average of 39.5 learning hours per employee. The company also launched CSR programs in STEM education, environmental sustainability, and skilling, opening up pathways for employees to contribute meaningfully to societal good.

Commenting on the Q4 FY2026 results, Guilherme Mendonca, Managing Director and Chief Executive Officer, Siemens Energy India Limited (SEIL), said: *"We closed FY2026 on a strong note, with Q4 reinforcing the momentum we built throughout the year. Annual revenue crossed INR 100 billion and our order backlog reached a record INR 203.6 billion, giving us a strong foundation for continued growth. Equally significant, we completed FY2026 with zero fatalities and zero lost time injuries. This reflects our strong safety culture and reinforces our belief that sustainable business performance must go hand in hand with the health and safety of our people. These results demonstrate the relevance of our portfolio and our ability to execute consistently as India's energy landscape transforms at an unprecedented pace. As we enter FY2027, our priorities remain clear: continue focus on people safety, execute our strong backlog with discipline, sustain profitable growth and create long-term value for our customers, shareholders and the country."*
